Or, [use a different email address](#)

You can close this window if you're done.

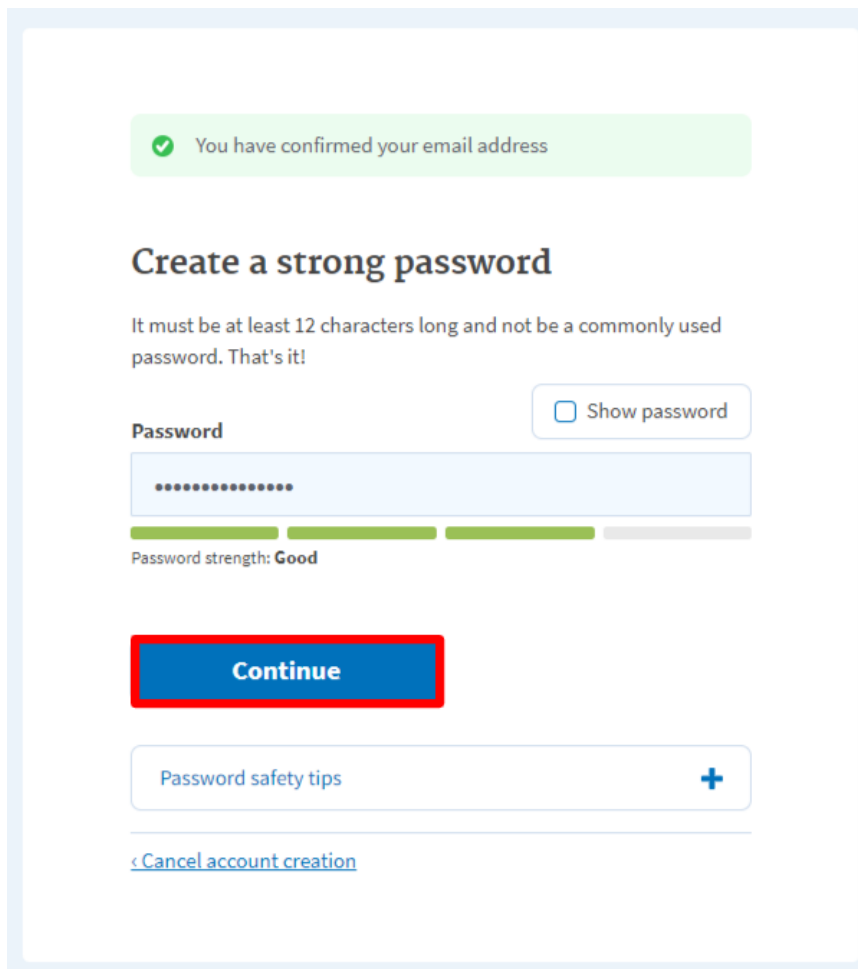

eFile and eServe

- From the notified mail click on the Confirm email address button.

- User will be directed to a page with a Password field and Continue button. Enter a strong password and click on the Continue button.

7. User will be directed to the authentication page. Select any option from the list and click on the Continue button.

Authentication method setup

Add a second layer of security so only you can sign in to your account.

Select an option to secure your account:

- Authentication application**
Get codes from an app on your phone, computer, or tablet. Recommended because it is harder to intercept than texts or phone calls.
MORE SECURE
- Security key**
Use a security key that you have. It's a physical device that you plug in or that is built in to your computer or phone (it often looks like a USB flash drive). Recommended because it is more phishing resistant.
MORE SECURE
- Phone**
Get security codes by text message (SMS) or phone call
SECURE
- Government employee ID**
Insert your government or military PIV or CAC card and enter your PIN
SECURE
- Backup codes**
We'll give you 10 codes. You can use backup codes as your only authentication method, but it is the least recommended method since notes can get lost. Keep them in a safe place.
LESS SECURE
