Privacy Act Statement
```

4. A message will be displayed notifying an email has been sent to the given email address.

```
✉️ Check your email

We sent an email to [email protected] with a link to confirm your email address. Follow the link to continue creating your account.

Didn't receive an email? Resend

Or, use a different email address

You can close this window if you're done.
```
5. From the notified mail click on the Confirm email address button.

6. User will be directed to a page with a Password field and Continue button. Enter a strong password and click on the Continue button.
7. User will be directed to the authentication page. Select any option from the list and click on the Continue button.

- **Authentication application**
  Get codes from an app on your phone, computer, or tablet. Recommended because it is harder to intercept than texts or phone calls.

- **Security key**
  Use a security key that you have. It’s a physical device that you plug in or that is built in to your computer or phone (it often looks like a USB flash drive). Recommended because it is more phishing resistant.

- **Phone**
  Get security codes by text message (SMS) or phone call.

- **Government employee ID**
  Insert your government or military PIV or CAC card and enter your PIN.

- **Backup codes**
  We’ll give you 10 codes. You can use backup codes as your only authentication method, but it is the least recommended method since notes can get lost. Keep them in a safe place.
